NAV BUILD

Today's Dynamic business demand, competitive market conditions, operational complexities, diverse workforce, desperate work location and fluctuating material demands an Industry ready ERP system to establish strict process governance for the Project Centric Industry to avoid profit erosion and ensure business growth.

Navbuild a value added extension to Microsoft D365 Business Central Aka NAV is designed with unmatched functionalities and features which turns out as a success factor for any project-centric businesses.

Project Planning

Precision in planning of cost and Schedule determines definite success. Navbuild BOQ definition against design combined with project work package planning results in accurate project budgeting. Bidirectional integration with MS Project and Primavera affirmates cost and schedule controls.

Project Execution

It's imperative to have an efficient and transparent procurement process to standby the plan to succeed. Navbuild ensures efficient planning while procuring material, labour and resources against defined work packages in line with the project budget. Any deviations can be tracked for assertive action to avoid delays.

Project Governance

Aligning combined workforce and resources to a common goal demands higher visibility and operational control. NAVBuild establishes operational financial disciplines by connecting all crucial operations against project budget and time with Process standardizations and data integrations across the modules. It brings out project's real-time status through effective industry ready KPIs, enables better project governance and efficiency.

VALUE PROPOSITION

NAVBUILD Brings tremendous value proposition to a project centric organization, Like :

Vendor Enrollment

Vendor Evaluation

Purchase Requisition

Self Service view of Invoices, Payments & Statement

Compare Quotes & Place Order

Quote submission against RFQ's

VMP365

Self Service Vendor Portal, built for Dynamics 365 Business Central/ NAV brings SIMPLICITY to your Supply Chain

Manual interactions with your suppliers and information disconnect slows down your business and may result in greater loss of time and efforts. VMP365 is an add-on solution designed to help Dynamics 365 Business Central customers to collaborate with their vendors on-the-go. VMP365 enhances the capabilities of Dynamics 365 Business Central by allowing the vendors to actively participate with an intuitive and dynamic portal while you, as the buying team, can automate various manual processes in procure-to-pay cycle and focus on other more important tasks.

Vendor on-Boarding

Simplify your vendor onboarding process and have greater control over document submittals and closures with security through notifications.

Requisitions management

Utilize a centralized buyer workspace to raise requests and define technical and commercial parameters for quotations. Your suppliers can view the required information and respond in real-time.

Automated Order Management

Collaborate to receive PO conversion of requisitions, amend POs, enforce spend limits with automated approval processes, send and receive notifications and view relevant information including orders history.

Self Service Collaborations & KPI Visibility

Collaborate easily with self-service facility in-built with Microsoft Azure for security and greater performance. Automated workflows, notification engine and KPIs will help managing exceptions, governance and performance standards.

Value Propositions:

- VMP365 delivers benefits for both your suppliers and your buyers through Self Service Portal and Buyer workspace, and this drives greater efficiency, increase visibility and reduce the time spent on administrative tasks and data duplication and replication.

- By leveraging Microsoft Azure, VMP365 is a secure, easy to deploy a solution with which you can go-live quickly.

Availability

VMP365 can be deployed on-premise or on cloud on Dynamics NAV 2013 and later versions and Dynamics 365 Business Central.
